

Sertronic®

Gas production, purification and filling

General Brochure

Our experience to your benefit

To meet the increasing global demand of purification units, the company *Sertgas industries*® was created in 1985 and became *Sertronic*® in 2001. Our first complete hydrogen production, purification and filling installation was installed in 1988 and is still in operation, attesting the reliability of our equipment.

Our purifiers are designed by our engineers and built in our manufacturing workshops in accordance with the international standards (PED, ASME, TrCu, ATEX...) and customer specifications.

Sertronic® offers a complete range of gas purifiers

- Flowrate up to 25 000 Nm³/h
- Pressure up to 420 barg
- Gas purity up to 7,0

- Optimized footprint
- Maximum reliability
- Availability up to 99%

PROCESS GAS	PURIFICATION METHOD	REMOVED IMPURITY
H ₂ , He, O ₂ , N ₂ , Ar, Rare gases All industrial gas	Catalysis Adsorption at ambient and cryogenic temperatures	H ₂ O, O ₂ , CH ₄ , Ar, N ₂ , CO, CO ₂ ...
Applications: Gas industry, Chemical industry, Greenhouse gas reduction, Semi-conductor industry, Research laboratories, Healthcare, (etc.)
